„European Congress on Anti-Aging and Aesthetic Medicine“

Dear Conference participants:

This year, the city of Mainz will be host city of the “2nd annual European Congress of Anti-Aging & Aesthetic Medicine”, which takes place from October 15th – 17th, 2009, at the Congress Center Mainz. Mainz is an academic and medical center of excellence, conveniently located on the banks of the river Rhine and in close proximity to Frankfurt Airport. Mainz is also situated in the middle of Germany’s wine-grown region and is proud to be one of the eight “wine capitals of the world” which by itself makes the city worthwhile visiting.

The University of Mainz Medical Center and the Faculty of Medicine of The Johannes Gutenberg University warmly welcome all delegates, speakers and experts in the field of anti-aging and aesthetic medicine. The world’s population is progressively aging. Thus anti-aging medicine is a field of increasing medical need. Anti-aging medicine will also be an area of substantial socioeconomic relevance and may significantly contribute to the longevity and wellbeing of the population. Likewise, aesthetic medicine has become one of the fastest growing areas in medicine and accommodates substantial public demand in the developed world. It is a highly innovative field of medicine that renders new research results and subsequent therapeutic procedures.

This conference will certainly foster the exchange of ideas, new research results, innovative therapeutic procedures and medical information in this exciting field. Thus, it will hopefully contribute to medical progress in the treatment of age-related dysfunctions, disorders and diseases.

I wish all participants a pleasant stay in Mainz.

Best regards

Prof. Dr. med. Norbert Pfeiffer
Medical Director

University Medical Center of the Johannes Gutenberg University
